

How to download cctv footage

Insert your USB device into an available port at the front or back of the Dvr

1. On the home screen, Select the folder icon on the top of the screen.

2. Once opened you will be able to select your camera channel, Start time & Date, End time & Date. On the left you can select which type of file you wish to search for. If your site has Vehicle detection or facial Recognition Cameras you can search from here also.

3. Next you will see a list of the files searched. After you have selected the files your looking for, you can click Export in the top right of the screen.

4. As seen in picture 5 here you can select a usb device in the drop down menu. Once you have selected it click export, and select File and log.

5. Your footage will now be downloading to your USB device. You can check the status of your download by clicking the icon in the top right corner as highlighted in image 5.
